

Amazon WorkSpaces: A cost-effective, managed cloud desktop for flexible work styles

Easily and securely provision cloud-based desktops

Amazon WorkSpaces is a managed Desktop-as-a-Service (DaaS) solution. With Amazon WorkSpaces, you can deploy your corporate desktop environment on the AWS Cloud, providing your users secure, convenient access to the applications, documents, and resources they need, on the device of their choice from almost anywhere in the world. Amazon WorkSpaces integrates with your current IT resources, so you can derive all of the benefits of virtual desktops while continuing to use existing policies and practices. No upfront investment is required, scaling is simple and quick, and it is built on the trusted AWS Cloud. Amazon WorkSpaces is available in multiple AWS regions worldwide, so you can deploy in a single region, or globally, and scale at your own pace.

Explore Desktop as a Service (and enjoy white glove customer service). Let's discuss your team's needs and build a customized workspace solution. Call (970) 670-0169 or visit our website today.

Move Your Team into a New Cloud Office!

Use cases

Amazon WorkSpaces is ideal for any situation where desktop needs can change quickly

High-Security Requirements

Mobile workers and remote employees

Temporary Workers

Employee-Owned Devices

Development and Test

Integrate with your existing corporate infrastructure

Amazon WorkSpaces can be smoothly integrated with your on-premises environment and Microsoft Active Directory, allowing your users to continue using their corporate credentials, and your IT department to maintain existing policies and processes. When you launch a new Amazon WorkSpace, you can choose to encrypt its volumes using AWS Key Management Service (AWS KMS). AWS KMS makes it easy to create and control encryption keys and uses hardware security modules to protect the security of your keys. You can also bring your existing Windows 7 and Windows 10 Desktop licenses to Amazon WorkSpaces and run the Windows 7 and Windows 10 Desktop Operating System on hardware that is physically dedicated to you. If your organization uses multi-factor authentication, you can incorporate your existing multi-factor authentication (MFA) practice by connecting your RADIUS server with Amazon WorkSpaces for increased security.

Why Amazon WorkSpaces?

Secure

Your Windows desktop and business-critical data is hosted on the AWS Cloud, and never leaves a securely managed environment.

Flexible and Scalable

Get started in minutes and grow your deployment from just a few users to tens of thousands with ease. Amazon WorkSpaces scales seamlessly with your needs and at your pace.

Cost-Effective

Amazon WorkSpaces requires no upfront investments or long-term commitment. You pay only for what you use, make your IT expenses predictable, and lower your costs.

Globally Available

Amazon WorkSpaces is available in multiple AWS regions. Global access allows you to add users in new regions simply and cost-effectively, and data remains in the region you assign it to for compliance with regulatory requirements.

Fast, Familiar User Experience

Amazon WorkSpaces offers a fluid, highly interactive user experience that adjusts dynamically to network conditions. Your users can access familiar Windows desktops with full fidelity from iOS, Android, Mac, and Windows devices, thin and zero clients, and even select smartphones.

Reliable

Amazon WorkSpaces is built on the highly reliable AWS Cloud that supports mission-critical workloads for many startups, enterprises, and government organizations.

Easy to Deploy and Manage

Amazon WorkSpaces is a fully managed Desktop-as-a-Service solution. The intuitive Amazon WorkSpaces admin console allows you to connect to your on-premises Microsoft Active Directory, manage applications, and control user access.

Consistent Performance

Amazon WorkSpaces runs on the massive compute infrastructure of AWS so it can offer consistent performance at any scale. Moreover, as the underlying infrastructure improves, you enjoy improved performance with predictable costs.

Why Choose Webapper

Webapper believes there's a better way to manage outsourced technology services. Our mission is to empower our clients to thrive using leading-edge cloud software technologies. Since we started in 2003, we've grown from some youthful, hard-working coders into an elite team of cloud software engineers who help customers leverage technology for competitive advantage. Companies choose us because of our epic technical experience, emphasis on clear communication, and commitment to delivering world-class technology solutions.

We have several Amazon AWS credentials, including AWS Certified Solutions Architect-Associate. While our experience with diverse web applications sets us apart, our AWS Partner Network credentials further demonstrate our knowledge of building & deploying systems in the cloud. We have employ architectural best practices based on our experience deploying, configuring, and managing network, storage, security, database and other services in
